The latest "chevron" actuator technology delivers consistent and reliable operation for the indoor and outdoor graphics markets.

Product information

Simple to install and easy to integrate are the 2 key characteristics of the Xaar Proton printhead. Using the same electronics as the Xaar 500 (similar to the Xaar 126 electronics) the Xaar Proton provides existing Xaar customers an easy integration path with minimal product development

Lockable ink and electronics connectors ensure stable, secure operation whilst printing, with nozzle protection minimising the impact of any media crashes. By using the latest actuator firing technology the Xaar Proton delivers consistent print and reliable operation to meet the needs of the grand format industry. The 53.7mm print swathe has 382 nozzles delivering a native print resolution of 180dpi with a current firing frequency of 9.5khz printing 35pl ink drops.

Unique features

Highest Print Quality

35pl drop size

180dpi native resolution

Consistent drop placement

Increased Productivity

9.5kHz firing frequency

Wide 53.7mm print swathe

Simplest Integration
